

HARDEN contract

Congratulations.

You have selected one of the finest chairs available in the marketplace today. Its unique features, styling and construction assure you of exceptional performance - comfort and durability in the tradition of Harden quality.

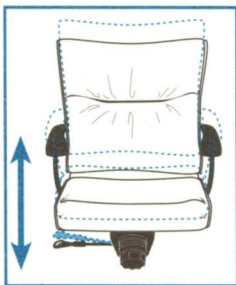

1200 POCKET CHAIR SERIES

Models — C1200-100, C1201-100
with Forward Tilt Control, Tilt Lock, and Gas Cylinder Height Adjustment

DESIGNED BY TOLLESON /DESIGN

Harden has designed this chair with some revolutionary design features that require some quick adjustments for maximum effect. Please take a moment to review the enclosed card and then store this card in your desk or near the chair for quick future reference.

GAS LIFT HEIGHT ADJUSTMENT

Paddle-shaped lever on right side while seated.

TO RAISE HEIGHT

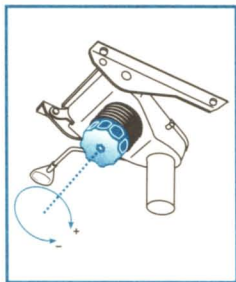

- Lift weight off seat.
- Pull right hand lever upward.

TO LOWER HEIGHT

- Remain seated.
- Pull right hand lever upward; body weight will lower.

Your chair should be adjusted so feet rest flat on floor. Dangling legs will put pressure on the back of thighs and restrict blood flow.

TILT TENSION OPERATION

Round dial in center of mechanism.

TO INCREASE TENSION

- Turn clockwise.
- Lean back into chair to check for correct tension according to your personal body weight.

TO DECREASE TENSION

- Turn counter-clockwise.
- Lean back into chair to check for correct tension according to your personal body weight.

Tilt tension should be adjusted according to your individual weight. Proper adjustment provides for effortless movement throughout the range of motion.

Cleaning:

Professional cleaning is recommended for all fabric in accordance with type of fabric specified. Leather may be cleaned with mild soap and water. Do not saturate with water; wipe dry. Black bases may be cleaned with glass cleaner and a soft cloth.
